

HOW TO STAY HEALTHY

while searching for a home

1. Instead of attending open houses, opt for scheduled showings OR Virtual Open Houses.

2. Wear gloves or carry a clean tissue to touch any high traffic areas.

Pay special attention to:

Doorknobs

Bathrooms

Kitchen faucets/
sinks

Handles

Tables

Light switches

Phones

Keyboards/
Tablets/
Computers

3. Take advantage of live virtual tours to view homes instead of attending an in-person showing.

4. We ask you to drive separately to meet at the homes you are viewing to adhere to social distancing guidelines.

5. Limit showings to a max of 2 Buyers and your agent preventing unnecessary people into a seller's home.

6. Use hand sanitizer or wash your hands immediately upon entry. Make sure to carry hand sanitizer, tissues and other health essentials with you.

7. For a showing, be aware that a seller may not leave their home. However, they will be asked to think of creative ways to allow you the privacy to tour their home without feeling crowded.

8. Note we have asked agents to sustain from attending your closing. Providing a safe environment for our closing partners is critical and this helps minimize the number of unnecessary people in their work environment.

9. If traditional in-person meetings are being done over the phone or video conference, know that it's with your best interest in mind.

10. Hold web meetings for negotiations, discussions or closings whenever possible.

11. When in doubt, follow all general health guidelines as laid out by the CDC to protect you and your family.
